EDUCATION

- Nagaland University** Dimapur, India
Bachelor of Technology - Computer Science Engineering; GPA: 7.48 July 2020 - June 2024
Courses: Object Oriented Programming, Operating Systems, Data Structures and Algorithms, Machine Learning, Networking, Database Management System, Real Time System

SKILLS SUMMARY

- **Programming Languages:** Python, C, C++, JavaScript, PHP, SQL
- **Networking & Systems:** IP Addressing, Subnetting, LAN/WAN, Routing Basics, Network Security, Router/Switch Setup, CCTV, PA Systems, BMS systems, Biometric
- **Web Development:** HTML, CSS (Bootstrap, Tailwind), Laravel, REST APIs
- **Data Science & ML:** Pandas, Scikit-learn, TensorFlow, NLP, Matplotlib, Predictive Modeling
- **Tools & Platforms:** PowerBI, Git, VS Code, Jupyter, Excel, Linux, Windows, Wireshark (Basics)

EXPERIENCE

- Honeywell Automation India Limited** Onsite
Site Engineer April 1, 2026 – Present
 - Perform regular site inspections to identify safety hazards, ensure compliance with standards, and monitor Building Management Systems (BMS) operations.:
 - Developed and implemented preventive maintenance strategies, resulting in a 15% improvement in equipment reliability and a 10% reduction in downtime.:
- KV NIT Silchar** Onsite
CS Teacher 22 June 2025 - 26 March 2026
 - Teaching Computer Science including Networking concepts (IP addressing, protocols, OSI model) to higher secondary students:
 - Maintained lab infrastructure, including routers, Ethernet networks, and system connectivity, while managing setup and monitoring of CCTV, PA systems, and campus surveillance networks.:
- Nagaland University** Hybrid
Startup - Naga Connect (Project Intern) 10 Oct 2024 - 28 Feb 2025
 - Assisted in installation and configuration of IP-based CCTV systems including NVR setup and camera connectivity:
 - Worked on local network setup including IP addressing, device connectivity, and basic troubleshooting:
 - Supported testing and configuration of wireless devices and surveillance systems for stable network performance:
- Yellowberry Technology** Hybrid
PHP Developer Intern 8 July 2024 - 8 Oct 2024
 - Developed Laravel-based applications improving performance and user experience:
 - Worked with server deployment, hosting environments, and backend optimization:

PROJECTS

- **Walmart Sales Data Analysis (GitHub):** Built ML model improving forecast accuracy by 15% using Python and Scikit-learn; handled structured datasets and optimized data processing workflows
- **Smart Tutoring System (GitHub):** Developed NLP-based personalized learning system; integrated edge computing concepts for low-latency responses and designed database using DBMS concepts; won Best Paper Award (BITMDM-2024)
- **Email Spam Detection (GitHub):** Achieved 95% accuracy using TF-IDF and Logistic Regression; implemented efficient data flow and preprocessing pipeline

EXTRACURRICULAR ACTIVITIES & ACHIEVEMENTS

- **Event Coordinator:** Led the successful organization of Techaura 2023, overseeing technical and creative events such as Code War, Code Chef, and fine arts competitions. Managed event logistics, coordinated with multiple teams, and enhanced participation engagement by 30%.
- **Published paper : Recommendation System to Assist Learner: Intelligent Tutoring System:** Awarded 'Best Paper' at the BITMDM-2024 international conference for publishing and presenting research on an AI-driven 'Intelligent Tutoring System' that leverages Natural Language Processing (NLP) for personalized learning. CERTIFICATES

- Industrial Internship Certificate on Data Science and AI -Ardent Computech Pvt. Ltd.- [LINK](#)
- Experience/Internship Certificate -Yellow Berry Technology.- [LINK](#)
- Full Stack Web Development - NIELIT -[LINK](#)
- SEBI- Investor Certification Examination -[LINK](#)
- HP LIFE- Data Science & Analytics-[LINK](#)
- Tech Saksham - AI: Transformative Learning with TechSaksham & Analytics-[LINK](#)
- Google - Data Analysis: Process Data from Dirty to Clean & Analytics-[LINK](#)
